SOP attached. It's pretty low level stuff, so I don't think it will be much help for your QAPP. I can also fill in CIMS details as needed if you want to send over the QAPP draft when it's getting close to completion.

Hey Theran

I'm still trying to make progress on the NY St Gobain QAPP. Can you send me your SOP referenced in your QAPP? Also, do you have a standard target list of compounds you look for? (I guess you have standards for?). I'm assuming the FTOHs as well as PFOA specifically.

I have not heard anything recently from the NY guys and wanted to at least get my thoughts together as much as possible so I can give them the general plan as I plug away at the ORD QAPP. I'll shoot the general plan to you as soon as I can.

Here's the CIMS PFAS qapp from a few months ago. It's kind of general, but there is some mention of SUMMA cannisters but nothing re. field sampling.
